

Advanced – 2 Days

Adobe Photoshop software, the professional image-editing standard, helps you work more efficiently, explore new creative options and produce the highest quality images for print, the Web and anywhere else.

Create exceptional imagery with easier access to file data; streamlined Web design; faster, professional-quality photo retouching; and more.

Objectives

The Advanced Photoshop course is available for those who wish to take their skills to the next level. This course covers colour settings and colour management, sophisticated image adjustment, additional special effects and advanced layer techniques.

Prerequisites

It is recommended that students have either attended the Introduction/Intermediate Photoshop course or have previous knowledge of those course topics.

Exercises

This course is instructor led, involving the utilisation of examples and exercises in a workshop environment.

Topics include:

Precise image calibration:

- Calibrating greyscale images
- Calibrating colour images

Advanced image adjustment methods

- Using 'replace colour'
- Using the calculations command
- The colour range command
- The purge command
- Photo filters
- Fading filter effects
- Creating tool presets
- Custom keyboard shortcuts
- Setting preferences
- Adding notes to an image
- Advanced masking methods
- Sharpening using LAB mode
- Using lighting effects
- Creating 3D textures
- The channel mixer

Creating and using macros

- Recording and using actions
- Droplets
- Batch processing
- The file browser

Advanced layer techniques

- Using clipping groups
- Layer blending modes
- Pattern and gradient layers
- Using post colour channels
- DCS format

Colour management

- Creating and using colour settings
- Overcoming more patterns
- ICC profiles

Questions and answers
